SUMMARY

Full-Stack Developer with hands-on experience in Python and Django, developing responsive and user-friendly websites. Skilled in front-end technologies including **HTML, CSS, JavaScript, and React**, and back-end development using **Django, MySQL, and RESTful APIs**. Experienced in building dynamic websites, implementing CRUD operations, API integration, and responsive design. Capable of developing complete website solutions from database design and server-side logic to interactive front-end interfaces. Passionate about using modern technologies to create efficient, secure, and high-performance websites.

CERTIFICATIONS

- **Python Programming – Illinois Tech, USA:** Completed certified training focused on core Python concepts, problem-solving, and practical applications.
- **Python with Django – Entri Elevate:** Gained hands-on experience in developing dynamic web applications using Django framework.
- **NSDC Certificate – India:** Recognized under the National Skill Development Corporation for technical skill development in programming.

SKILLS

Technical Skills:

- Programming & Frameworks: Python, Django, JavaScript
- Front-End Development: HTML, CSS, Bootstrap, Responsive Web Design
- Database Management: SQLite, MySQL, SQL
- Version Control & Tools: Git, GitHub, Visual Studio Code
- Full-Stack Development: Building and integrating dynamic front-end interfaces with secure back-end systems

Soft Skills:

- Strong teamwork and collaboration abilities
- Effective communication and problem-solving skills
- Excellent time management and attention to detail

EDUCATION

Bachelor of Commerce

2022-2024

Bharathiyar University,Tamil Nadu

Hydraulics- React Website

<https://github.com/shahana133/metric-mechanical>

- Developed a responsive static spare parts website using React to display products and company information.
- Focused on user-friendly navigation and optimized layout for better user experience.
- Focused on fast loading and smooth navigation for better user experience.
- **Live website:** <https://shahana133.github.io/metric-mechanical/>

Rice Export Website

<https://github.com/shahana133/rice-export-website>

- Developed a responsive rice export company website to showcase products, company information, and contact details.
- Implemented responsive design to ensure the website works smoothly on desktop, tablet, and mobile devices.
- Focused on clean UI design and performance optimization for faster page loading.
- **Live website:** <https://shahana133.github.io/goldengrain-website/>

Organic Fruits And Vegetables Selling System

<https://github.com/shahana133/organic-webapp>

- Developed a full-stack web application connecting organic farmers and customers for direct produce sales, promoting sustainability and transparency.
- Implemented core features like user registration, product management, order tracking, and reviews using Python, Django, and MySQL.
- Designed a responsive, user-friendly interface with HTML, CSS, and JavaScript, ensuring a seamless online shopping experience.

Restaurant Menu System

<https://github.com/shahana133/entri-mini-project-git>

- Created a Python-based restaurant menu management system enabling users to add, view, and organize menu items efficiently.
- Integrated order placement and automated bill calculation features for smooth and accurate operations.
- Designed a simple, user-friendly console interface utilizing Python's data structures and file handling for data storage and retrieval.
